

PITAD School of Economics & Trade

Announces admission in its most comprehensive and all-in-one

Post Graduate Diploma in Applied Quantitative Research Techniques

Proficiency in Quantitative Research Methods is one of the pre-requisites for Research and Development in the fields of Economics, International Trade, Management and Social Sciences. Providing a challenging atmosphere, PITAD inculcates the true essence of advanced research techniques in its researchers to equip them with latest skills and techniques to produce high quality research. This Capacity Building Program will focus to enhance capabilities of the individuals and organizations and create the dexterity to meet the developmental challenges.
